

DURAIRAJU K

Senior Product Manager — Logistics Platforms, Marketplaces & AI Products

📍 Bengaluru, India ✉ durairaj6893@gmail.com ☎ +91 9791725973 🔗 [linkedin.com/in/durairaju](https://www.linkedin.com/in/durairaju)

PROFESSIONAL SUMMARY

Product leader with 9+ years building B2B SaaS and marketplace platforms across logistics, fintech workflows, and AI. Ships intelligent systems — geospatial matching, ML-based ETA prediction, delivery orchestration — that move core metrics: order fulfillment 85%→92%, enterprise on-time delivery 82%→95%, partner activation 34%→65%. Co-founded and exited a product agency (INR 3 Cr ARR); leads cross-functional teams of 25+. Currently building LLM-powered products hands-on with Claude and agentic workflows.

CORE COMPETENCIES

Product Strategy & Vision • Platform & Systems Thinking • Marketplace Supply-Demand Matching • ML/AI Product Development • Workflow Automation • Unit Economics & SLA Ownership • Financial Products (GL, AP/AR, DSO) • Cross-functional Leadership • PRD & Spec-driven Execution • Voice of Customer

WORK EXPERIENCE

LetsTransport

Bengaluru • Jul 2021 – Present

Promoted from Growth PM to Senior PM; own marketplace allocation, fleet intelligence, and delivery orchestration across inter-city and intra-city logistics.

Senior Product Manager

Apr 2024 – Present

- **Own and lead a 10-member cross-functional product pod** — engineers, UX design, data analytics, and an associate PM — driving discovery through delivery for the allocation, ETA, and orchestration systems below.
- Built an intelligent order-driver allocation engine (H3 geospatial indexing + relevancy-based driver ranking) for Loadster, a truck-booking marketplace (10K+ drivers, 5K+ clients) — lifting **allocation success rate from 65% to 92%** (orders allocated with zero manual intervention).
 - Cut allocation time ~60%; driver acceptance +15% via relevancy-ranked targeting; driver utilization +20%; manual interventions -50%.
- Shipped an ML-based ETA prediction system for inter-city trucking — modeling historical halting patterns, route features, and driver behaviour where Google Maps ETAs fail for long-haul trucks — achieving **95% ETA accuracy against actual delivery times**, enabling committed delivery windows and on-time SLA attainment for enterprise clients.
- Built end-to-end intra-city delivery orchestration (load building, route planning, vehicle allocation, fleet tracking, live visibility) — moving enterprise last-mile **on-time delivery SLA from 82% to 95%**.
- Automated driver advance verification via E-way Bill API integration — **90% of advances now auto-verified**, removing a per-trip manual ops bottleneck.
- Scaled the Partner app to 100K+ downloads and 30K+ MAU; launched real-time payment visibility, improving partner adoption by 15%.
- Reduced Google Maps API consumption by 99%+, eliminating ~1.5M route requests through H3 geospatial indexing and routing architecture redesign.

Growth Product Manager

Jul 2021 – Mar 2024

- **Built an Order Management System (OMS) with embedded financial controls** — reduced unbilled DSO by 20 days, improving revenue recognition accuracy for finance teams.
- **Built “BidEdge”, a spot-market load intelligence and bidding system** — scrapes non-contracted indents from load-posting portals and recommends optimized bids for sales — **growing non-contracted bookings from 5% to 45%**; indent win rate +23% on external portals.
- Improved partner activation from 34% to 65% through onboarding redesign and funnel experimentation.

Co-Founder & Head of Product | Webboombaa

Chennai • Jun 2016 – Jun 2021

Co-founded and scaled a product marketing agency to INR 3 Cr ARR; acquired by a US-based venture-building firm.

- Built an in-house Sales CRM with lead scoring, next-best-action recommendations, automated follow-ups, and customer segmentation — **increasing lead conversion by 22% and reducing sales cycle time by 12 days**.
- **Operated an integrated build-measure-learn growth engine** for client products across 15+ industries: launch MVPs → run performance campaigns → convert leads and online sales → feed user and campaign data back into product iteration.

- Ran full-funnel, data-driven acquisition across programmatic advertising (DSP/SSP-side), Google, Meta, and organic channels (SEO/SMM) — using Google Analytics-led audience segmentation to direct spend and sharpen targeting.
- **Built an ad-inventory search and media-planning platform** — advertisers enter budget and audience interests, and a search-and-recommendation engine (Elasticsearch with fuzzy matching and relevance ranking) generates reach-optimized ad plans within budget.
- **Built a two-sided influencer marketplace 0→1** connecting 30K+ creators (micro, macro, and celebrity tiers) with businesses — designed a price-calculation engine for creator rate discovery and a transparent margin layer, **monetizing at a 20% take rate on ₹10K average order value**.
- Led a 25+ member cross-functional team across Product, Marketing, Sales, and Operations.

PERSONAL PROJECTS — APPLIED AI

AI Job Application Copilot | Claude (Anthropic) • Streamlit • Python • Supabase Live app • 2026

- Built and deployed an LLM-powered copilot producing ATS match scores, skill-gap analysis, tailored cover letters, and STAR interview prep.
- Practiced PRDs-as-code: versioned specs with acceptance criteria executed by an AI coding agent (Claude Code); structured JSON outputs for reliability.
- Owned the full lifecycle solo: secrets management, Supabase auth, CI-style auto-deploys, per-token cost control. Roadmap: RAG (pgvector) and an agentic pipeline with human-in-the-loop approval.

SKILLS & TOOLS

- **Product Management:** Strategy, Roadmaps, PRDs & Spec-driven Development, User Stories, Agile/Scrum, OKRs, JIRA, Confluence
- **AI / LLM:** Prompt Engineering, LLM APIs (Anthropic Claude), RAG, Agentic Workflows, Claude Code, Cursor, VO, Lovable, Figma Make, Streamlit
- **Analytics & Data:** BigQuery, Amplitude, GA4, MoEngage, Funnel Optimization, A/B Testing
- **Financial / ERP:** Financial Reporting, General Ledger, AP/AR, DSO Reduction, Invoicing, Reconciliation
- **Engineering Collaboration:** Supabase, GitLab CI/CD, GCP, Cloud SQL, REST APIs, Postman, Git/GitHub

EDUCATION & CERTIFICATIONS

- **MBA – Marketing & Operations**, Sairam Institute of Management Studies, Chennai (2015–2017)
- **B.E – Electronics & Communication Engineering**, J.J. College of Engineering & Technology (2011–2015)
- AI Product Management – Udacity • AI-Powered Marketing – IIM Calcutta • Product Growth – GrowthX • PM Curve

AWARDS & RECOGNITION

- Rookie Award, Outstanding Performer & Game Changer – LetsTransport (2021–Present)
- Best Product Marketing Company – Zee Business & Ministry of India (2019)
